

Introduction to *Packet Radio*

Kern County Emergency Operations Center - PBBS Check-in

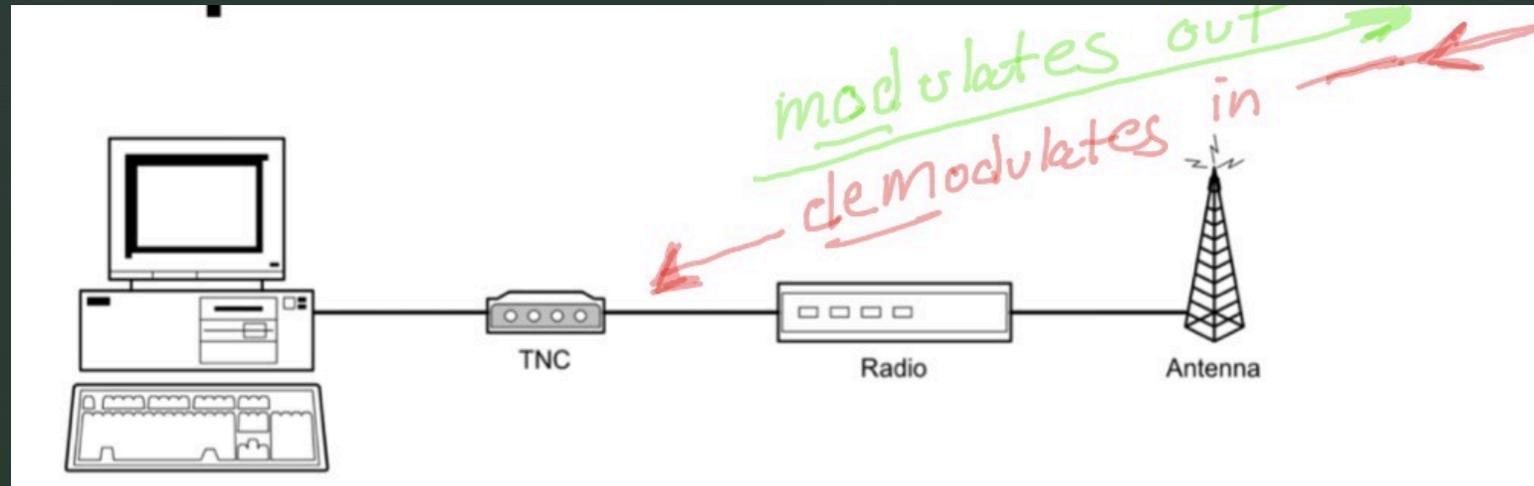

Richard – KK6RJR

Introduction To Packet Radio

- *Packet Radio is a digital mode available to all licensed amateur radio operators.*
- *Packet Radio is based on the Ax. 25 protocol used for sending information for such activities as APRS, Winlink, and of course posting information on the Kern Co. EOC personal Bulletin Board System mailbox.*

Components of a Packet Station

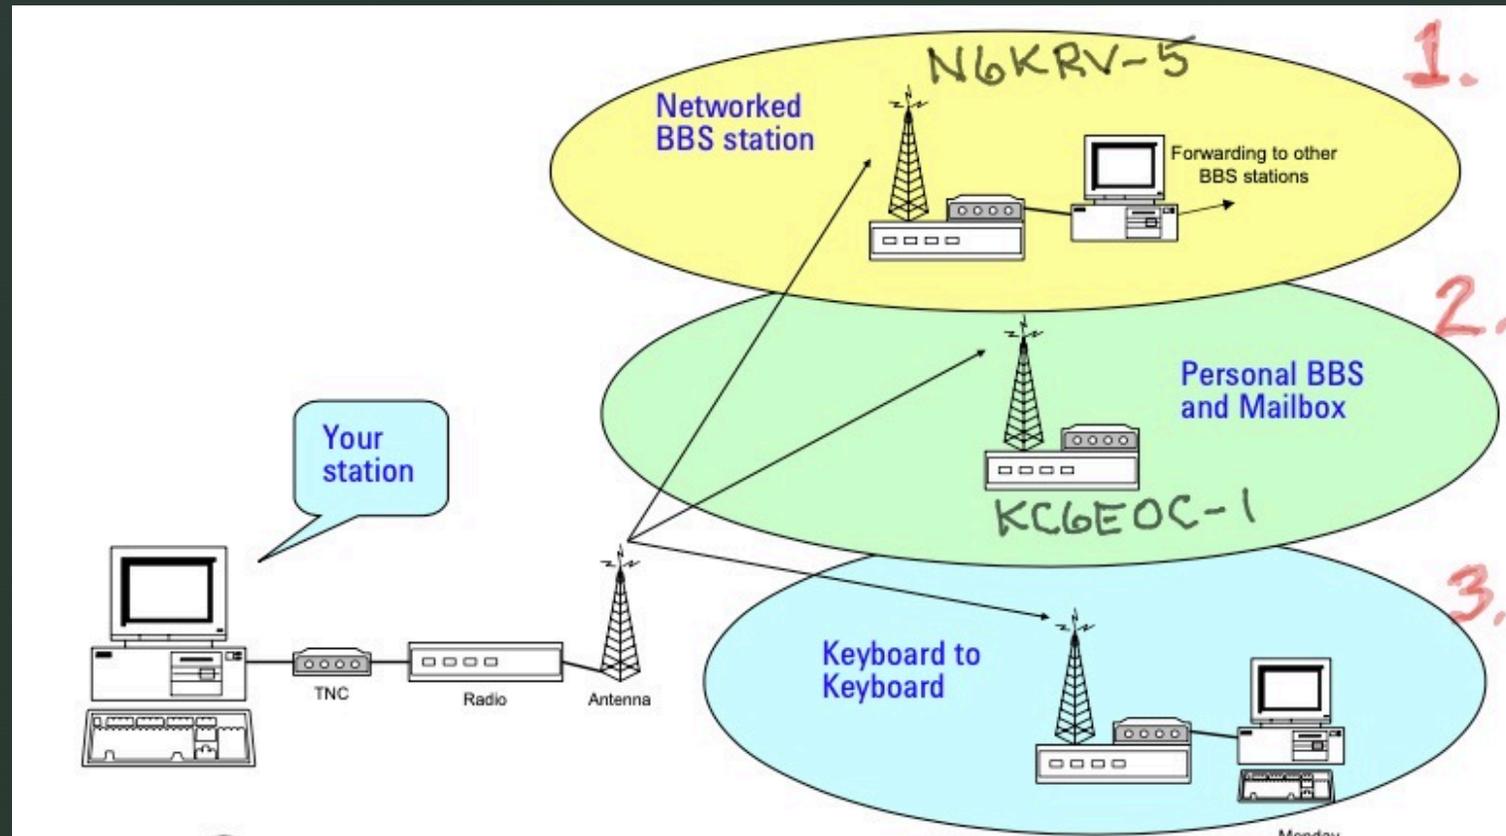

Computer: runs a “terminal emulation” program

TNC (Terminal Node Controller): similar to a modem, that is the interface between your radio and your computer

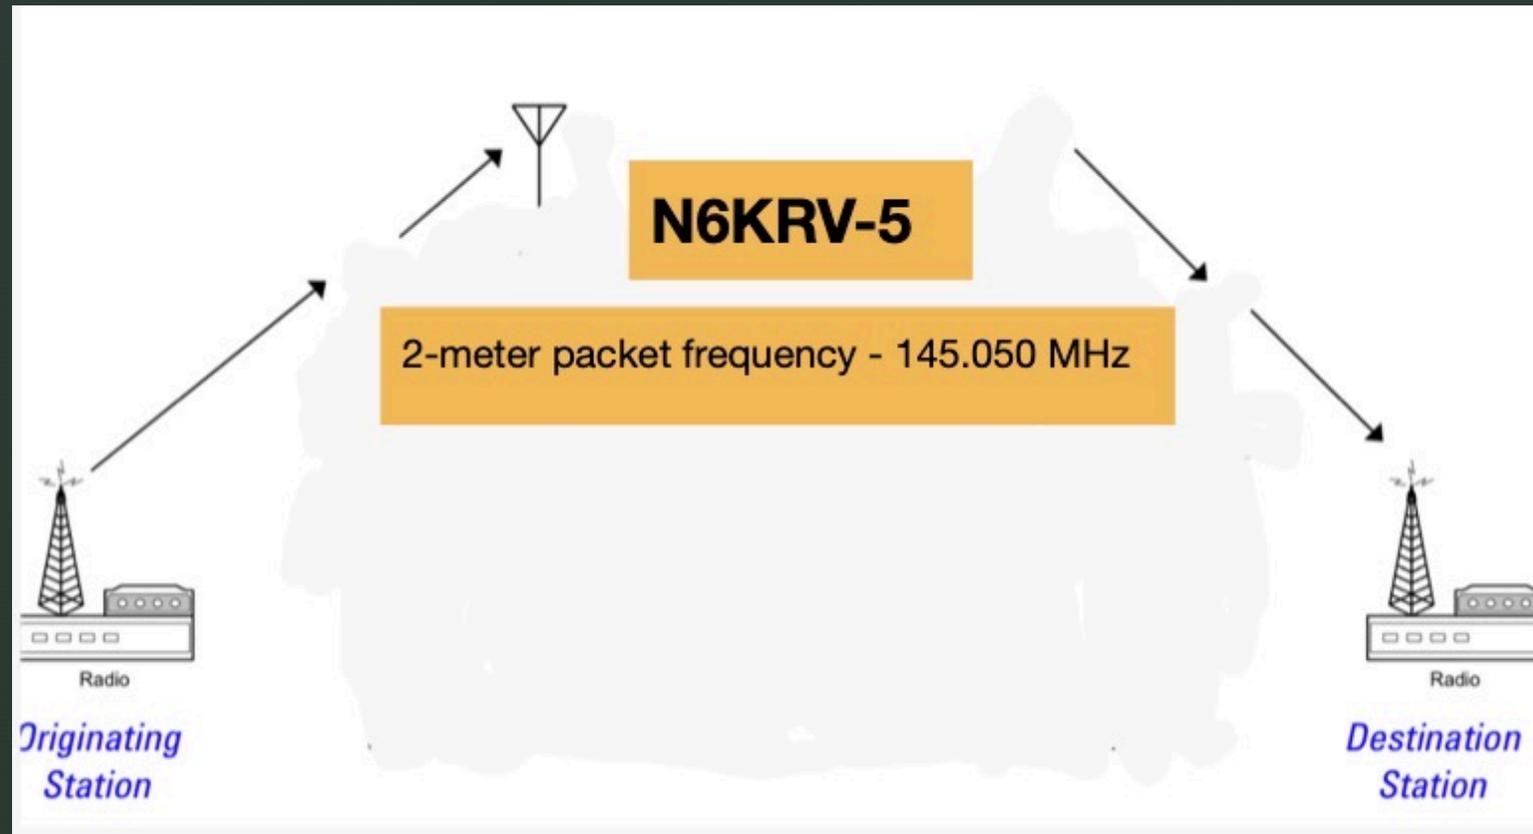

Radio (w/antenna) : transmits the digital data from the TNC to another packet station

What can we connect to?

Networked BBS Stations

passing a message from N6KRV-5 to KC6EOC-1

TNC and BBS Commands

TNC Commands

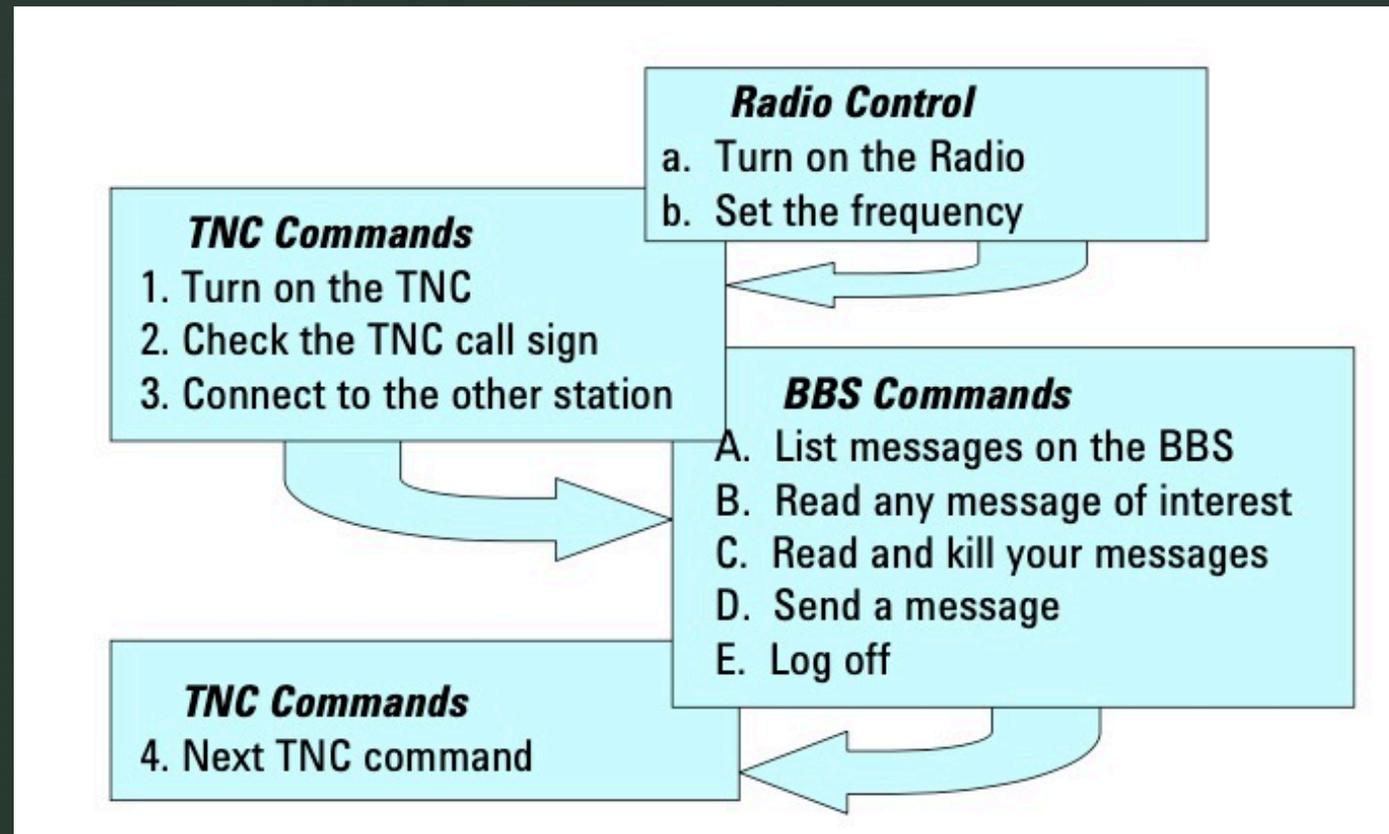

- CONNECT - connects to another TNC

BBS Commands

Commands that control the remote BBS station

- Help, ? - displays list of commands
- List - lists messages you can read
- Read - read a message
- Send - send a message
- Kill - delete a message
- Bye - log off this BBS

Summary of a Typical TNC Session

Powering on the TNC
